EXPERIENCE

Rundoo January 2026 - April 2026
Software Engineer Intern Redwood City, CA

- Built Rundoo's **first gift card product** across web and mobile point-of-sale apps, including activation, redemption, balance tracking, and **2 default analytics reports**.
- Led a **40+ PR refactor** of the payments protocol buffer schema across Go, TypeScript, and React Native, staged behind feature flags for zero-downtime rollout and deleting **5,000+ lines** of legacy code.
- Built country-aware address validation with Canadian autocomplete, timezone geocoding, and regional tax rates to enable Rundoo's **first international market**.

Splunk May 2025 - August 2025
Software Engineer Intern San Francisco, CA

- Developed scalable Java Spring Boot REST APIs and UI workflows for on-call incident response workflows, reducing investigation time by **30x** on average.
- Built Java Spring microservices for runtime configuration of AWS ML pipelines, reducing parameter change deployment time by **99%**.
- Built self-service API endpoints for AWS Glue job execution, cutting operational time by **93% (30 mins to 2 mins)** and eliminating manual console workflows.
- Awarded **Most Impactful Intern Project** in Security Org for achieving the term's top efficiency gains.

Onsemi September 2024 - December 2024
Software Engineer Intern Waterloo, ON

- Built a language compiler using ANTLR4, reducing compilation time by **30%** and enabling the generation of **50+ core microcode configuration files**.
- Developed configuration UIs for **5+ semiconductor products** using the QT framework and C++, enabling intuitive parameter tuning and real-time performance monitoring for manufacturing operators.

Siemens January 2024 - April 2024
Software Engineer Intern Toronto, ON

- Developed a C# display application with SQL Server backend for real-time parts tracking, reducing inventory lookup time by **96%** on average.
- Built a Windows Form application to streamline PCBA assembly workflows across **11 product lines**, reducing overall assembly errors by **30%**.

Insurance Bureau of Canada May 2023 - August 2023
Software Engineer Intern Toronto, ON

- Created automated test scripts for manual test cases using Selenium and Katalon Studio, boosting efficiency and reducing overall testing times by **over 95% (20x)**.

PROJECTS

MotiSpectra - ConUHacks 2nd Place 🏆

- Built a real-time emotion and attentiveness analysis app using **Next.js**, **Python**, and custom **ML models**, integrating into Zoom/Meet/Teams and visualizing results via dynamic radar graphs with **97%** emotion detection accuracy.

EDUCATION

University of Waterloo Sep 2022 - Apr 2027
Bachelor of Computer Science (Co-op), AI Specialization, 3.8 GPA, 87.5 CAV

SKILLS

Languages	Python, Java, C++, JavaScript, SQL, Bash, C, R
Frameworks	Spring Boot, React, Next.js, TensorFlow, PyTorch, Django, Node.js
Tools	AWS, Kubernetes, Git, PostgreSQL, Docker, Jupyter, Linux
ML/AI	Machine Learning, Computer Vision, Object Detection, NLP, Deep Learning, Model Deployment
